dyslexia, after his parents divorced, he failed 5th grade and was no longer allowed to do the only thing he loved to do, play football. So what is the solution? Parent Program:

Schools and Leadership organizations across the country have the same issues. Our youth do what youth do and parents complain about it to the schools and expect the school to solve their issue for them. Now the school can definitely put together an initiative to make this happen, but at the end of the day, it is on the parents to be parents and not best friends.

Getting parents to attend an event is even harder especially the ones that need to be there most. Richie prepares a video that can be sent to all of the parents to entice them to show up and usually there is a great showing. He helps parents understand what kids are thinking when it comes to suicide, bullying, drugs/alcohol and other issues kids face and how to handle it.

Richie understands everyone has their own style, but knowing what the kid is thinking is paramount. If you would like to solve issues with the students and parents, Richie is your guy to unite everyone. Fill out the form below to check Richie's availability and learn more
